SLIDING DOORS
Made to Measure Wardrobe Systems

SLIDING DOORS
Made to Measure Wardrobe Systems
A fusion of traditional styling with modern materials to create a stunning array of sliding door options.

Choose from Oak, Walnut or White frames, designed to epitomise the classic Shaker style, then either complement with matching wood effect panels or make a bolder statement with a contrasting wood colour or glass panel in any combination. Let your imagination take over.

The Shaker frames are perfectly matched to the wood effect panels. Within the Shaker sliding door range you’re able to mix glass and wood effect panels together to create your perfect sliding door design.

Door Designs

Available as 1, 2, 3 or 4 panel design.
Our gorgeous Minimalist range is unashamedly Italian influenced and makes a bold statement in any modern home.

Rich glass & wood effect colours add warmth and drama and just ooze luxury. The subtle, brushed aluminium frame is deliberately understated, allowing the coloured panels to dominate the design to a breathtaking effect.
A fusion of traditional styling with modern materials to create a stunning array of sliding door options.

Choose your frame finish, then either complement with matching wood effect panels or make a bolther statement with a contrasting wood colour or glass panel in any combination. Let your imagination take over.

It’s surprisingly easy to install a Made to Measure sliding wardrobe system

Simply measure the space you’re going to use for your wardrobe, give us your measurements and we’ll make your doors and track sets to just the right size. Fit your bottom track, then the top one and pop the doors into the track. That’s it. A beautiful and stunning wardrobe in a few simple steps.

1. **Fitting to ceiling and wall to wall.**
   - Measure your opening height and width at the five points indicated on the diagram.
   - **NB.** Please take into account any obstruction such as coving, skirting, radiators etc. and either remove them or build an unobstructed opening around them.
   - If there is any difference between the measurements of A, B or C, this means that your ceiling and floor are not parallel. Your track sets will allow for a difference of +/- 12mm. Doors will be made to fit the smaller of the 3 height dimensions.
   - Walls should be as vertical, and parallel, as possible. Adjustment in the door will allow for out of square openings up to 20mm maximum. Doors will be made to fit the larger of the 2 width dimensions.

2. **Fitting to a doorway or window opening.**

3. **Fitting with a side panel.**

4. **Reducing your ceiling height (if room is higher than 2480mm).**

Please Note: Please see your space-pro distributor for their full colour palette.
